

FOR IMMEDIATE RELEASE

Maporium and Cannigma Partner to Launch “Cannabinoids in Context”

“A New Way to Explore Cannabis Science Through Whole Systems Interaction”

Point Richmond CA, October 20, 2025 — Maporium, a pioneer in advanced comprehension technology, is proud to announce a new partnership with Cannigma, the authoritative source for science-backed cannabis information. Together, they have launched “Cannabinoids in Context”, a groundbreaking interactive tool that allows users to explore the effectiveness of different cannabinoids on various health conditions, all within a dynamic, visual system map.

Hosted on the Cannigma website, this new “smap” (systems map) offers an intuitive and engaging way to understand the complex relationships between cannabinoids, therapeutic applications, and scientific evidence. The smap may be embedded into any website and accessed without the need for additional software, making it easier than ever for users to interact with complex knowledge systems.

“Cannabinoids in Context” is not just a static diagram, it’s a fully navigable map that invites users to explore cannabis science from multiple angles. With a built-in tutorial, even first-time visitors can quickly learn how to:

- explore **Scenes** that present specific topics in detail;
- play **Stories** to gain holistic perspectives from different points of view;
- discover how cannabinoids interact with various conditions in a clear, contextual way.

“This collaboration with Cannigma is a perfect demonstration of how Maporium smaps can bring clarity and interactivity to complex information,” said John Garn, Chief Context Officer at Maporium. “We’re excited to see how users engage with the smap and what insights they take away from the experience.”

Visit [Cannabinoids in Context](#) and experience a new way to find content in context.

About Maporium

Maporium is a software company developing a universal language to help people better comprehend the world and solve problems together. With its innovative systems mapping platform, everyone can visualize and understand complex business, environmental, and social systems while uncovering hidden patterns, identifying leverage points, and making smarter, data-driven decisions. Trusted by researchers, educators, businesses, and strategists worldwide, Maporium drives deeper insights and impactful outcomes.

About Cannigma

Cannigma is a trusted platform for evidence-based information on cannabis, bridging the gap between science and the public. With expert-reviewed content and practical guidance, Cannigma empowers users to make informed choices about cannabis use.
